NEPHROS

Ice Machine Multibarrier Kit

For infection control and reduction of scale; chlorine, taste, & odor+

DSU-H Ultrafilter

- Retains bacteria, viruses and endotoxins
- Mitigates risk and aids in infection control
- 0.005 micron pore size with dual-stage, hollow-fiber technology
- FDA-cleared as a Class II filter for use up to 180 days

DSU-H Ultrafilter Specs

(Infection Control)

15-Series Filter⁽¹⁾

- Reduces scale, chlorine, taste, odor, cysts, and Class I particulate⁽²⁾
- Supports extended equipment life; reduces maintenance and energy costs
- Inhibits scale build-up without polyphosphates

(Scale, Chlorine, Taste & Odor+)

Our Multibarrier Kit works with ice machines, water fountains, or any other in-line application

Nephros Multibarrier Kit

Item # 70-0296F

Contents:

(1) DSU-H Ultrafilter
(1) 15-Series Filter
(1) DSU Cover
(1) In-Line Install Kit
(1) Disinfection Kit
(1) Everpure Manifold

Max Inlet Pressure ⁽³⁾	100 psi (6.8 bar)	Pressure	30-100 psi
Material	Polysulfone	Gallon Rating	12,500
Pore Size	0.005 micron	Pore Size	1 micron
Bacteria Retention ⁽⁴⁾	>10 ¹¹ (B. diminuta)	Temperature	35-100°F
Virus Retention	>10 ⁸ (PhiX-174)	Flow Rate	2.0 GPM
Endotoxin Retention	>10 ⁵ (EU/ml)	Connections	Everpure (E-Key)
Surface Area	2.8 m ²	Replacement	6 months
Clean Water Flow Rate	3.0 GPM at 60 psi (4 bar)	Dimensions	14.75" L x 3" D
Connections	QC (CPC (APC)); Threaded 1/2 NPSM		
Replacement	Up to 6 months		
Configuration	Dual-stage ultrafiltration		
Dimensions	13" L x 2.5" D		

(1) Tested to NSF/ANSI 42 and 53 standards. (2) Particles 0.5 to 1 micron in size. (3) For inlet pressures above 75psi, a pressure regulator should be installed (<75psi) to account for plumbing system pressure fluctuations (typically up to +/- 25psi). A hammer arrester should be installed in applications where water hammer may be present. (4) DSU-H filters have been validated by a 3rd-party certified laboratory, in accordance with ASTM F838-20 "Standard Test Method for Determining Bacteria Retention of Membrane Filters Utilized for Liquid Filtration," with total bacteria retention as defined by "Sterilizing Grade" filter. Nephros DSU-H Validation Report: NEP020422. For additional reference see: FDA "Guidance for Industry: Sterile Drug Products Produced by Aseptic Processing — Current Good Manufacturing Practice," September 2004.

Nephros is committed to improving the human relationship with water through leading, accessible technology. We provide innovative water filtration products and services, along with water-quality education, as part of an integrated approach to water safety. Nephros goods serve the needs of customers within the medical and commercial markets, offering both proactive and emergency solutions for water management.
