Safe Harbor Statement

Certain statements in this management presentation constitute "forward-looking statements." Such statements include those regarding our ability to execute on our growth strategy, our plans to develop new products and technologies, including the the efficacy and intended use of such products and technologies, the timelines and strategy for bringing such products to market, our ability to achieve sustained profitability, and other statements that are not historical facts, including statements that may be preceded by the words "intends," "will," "plans," "expects," "anticipates," "projects," "predicts," "estimates," "aims," "believes," "hopes," "potential" or similar words. Forward-looking statements are not guarantees of future performance, are based on certain assumptions and are subject to various known and unknown risks and uncertainties, many of which are beyond our control. Actual results may differ materially from the expectations contained in the forward-looking statements. Factors that may cause such differences include, but are not limited to, that (i) we face significant challenges in obtaining market acceptance of our products, which could adversely affect our potential sales and revenues; (ii) our dependence on third party suppliers, manufacturers and distributors; (iii) product malfunctions could trigger recalls, class action lawsuits and other events that could cause us to incur expenses and may also limit our ability to generate revenues from such products; (iv) we face potential liability associated with the production, marketing and sale of our products, and the expense of defending against claims of product liability could materially deplete our assets and generate negative publicity, which could impair our reputation; (v) we may not be able to obtain funding if and when needed or on terms favorable to us in order to continue operations; (vi) our ability to maintain sufficient capital to successfully implement our business plan; (vii) to the extent our products or marketing materials are found to violate any provisions of the U.S. Food, Drug and Cosmetic Act or any other statutes or regulations, we could be subject to enforcement actions by the U.S. Food and Drug Administration or other governmental agencies; (vii) we may not be able to effectively market our products; (viii) we may not be able to sell our water filtration products at competitive prices or profitably; (ix) we may encounter unanticipated internal control deficiencies or weaknesses or ineffective disclosure controls and procedures; (x) we may not be able to obtain appropriate or necessary regulatory approvals to achieve our business plan; (xi) we may not be able to secure or enforce adequate legal protection, including patent protection, for our products; and (xii) we may not be able to achieve sales growth in key geographic markets. More detailed information about us and the risk factors that may affect the realization of forward-looking statements, including the forward-looking statements in this management presentation, is set forth in our filings with the SEC, including our Annual Report on Form 10-K for the year ended December 31, 2024, and our other periodic reports filed with the SEC. We urge you to read those documents free of charge at the SEC's web site at www.sec.gov. We do not undertake to publicly update or revise our forward-looking statements as a result of new information, future events or otherwise, except as required by law.

2024 CORPORATE PRESENTATION

Overview

Nephros provides leading filtration solutions to a variety of industries including healthcare, hospitality, institutions, government, and manufacturing

Nephros water filters support medical and commercial use, with options for contaminants like scale or sediment, and FDA-cleared Class II products for infection control and dialysis water or bicarbonate concentrate

Investment Highlights

- New executive team rationalizing and re-energizing leading water filtration provider
- Proprietary technology with multiple competitive advantages
- Growing demand fueled by regulatory tailwinds
 - ASHRAE 514 infection control
 - · ST108 sterile processing
 - AAMI standards dialysis
- Nearing GAAP profitability from increasing revenue momentum and positive cash flow
 - Growing recurring revenue from programmatic customers
- Strong balance sheet with no debt to support growth initiatives

Professional Executive Team

ROBERT BANKS
President & CEO

Robert has a proven track record of delivering value through innovation and aligning the strengths of his organization with customer needs to drive profitable growth. Most recently, he was the Executive Director of Product Management at ITT Gould's Pumps, responsible for sales and marketing of the commercial pump portfolio. Earlier, Robert was the VP of Global Strategic Accounts at Danfoss Power Solutions.

JUDY KRANDEL
Chief Financial Officer

With more than 20 years of experience in asset management, investment, operations, reporting and oversight, as well as formal accounting expertise, Judy has an impressive record of financial leadership and planning. Previously, Judy was CFO at Recruiter.com and Paltalk Inc., both public companies. Judy holds a Bachelor of Science in Finance from the Wharton School and a Master of Business Administration from the University of Chicago Booth School of Business.

Board Of Directors

— ROBERT BANKS

President & Chief Executive Officer

Responsible for leading the organization with a clear, set vision, developing a strategy to achieve that vision, and then executing that strategy. Robert leads our team to success by inspiring and motivating employees, building strong relationships with customers and stakeholders, and making difficult decisions, all while managing resources effectively. Robert's favorite part about working at Nephros is the opportunity to work with best-in-class technology while taking our partner and customer relationships to extraordinary levels as we grow and create shareholder value. Robert holds a Bachelor of Mechanical Engineering from the University of Delaware, along with a Master of Business Administration from the University of Maryland.

ALISA LASK

Alisa is currently the Chief Commercial Officer for Rion, a regenerative medicine company. She brings more than 20 years of commercial experience in sales and marketing across the pharmaceutical, medical device, and cosmeceutical sectors. Her broad commercial experience in both U.S. and Global markets includes launching and renewing brands through digital transformation, disruptive go-to-market strategies, and award-winning consumer marketing. Alisa is also a Director of CollPlant Biotechnologies Ltd., a publicly traded regenerative medicine company.

— JOE HARRIS

Joe is currently the Midwest Sales Director at Murj, a digital health company focused on patients with implantable cardiac devices. Previous roles have included Sales Director positions at HeartFlow, Inc., BIOTRONIK, and Boston Scientific. Joe is a U.S. Army veteran and graduate of the U.S. Military Academy at West Point.

— ARTHUR AMRON

Arthur was for more than 20 years a partner and General Counsel of Wexford Capital until December 2023, and he continues as a special limited partner of, and consultant to, Wexford. During his tenure at Wexford he participated in various private equity transactions, particularly in the bankruptcy and restructuring areas, and has served on the board committees of several public and private companies in which Wexford held investments.

OLIVER SPANDOW

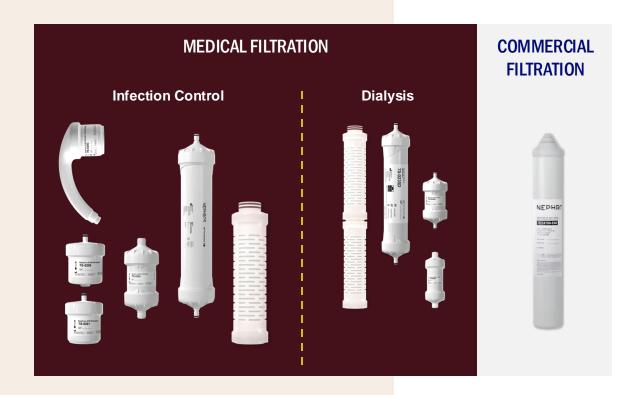

Oliver is currently the Chief Financial Officer, Executive Vice President, and a Director of IDOC, LLC, an optometry-based consulting and member service organization. Previously, Oliver spent 15 years with Johnson and Johnson (J&J), including as General Manager of the Vision Care business in the UK and Ireland, in addition to general finance, sales and marketing roles with work on multiple acquisitions, divestment, and licensing deals. Earlier, Oliver was a Management Consultant with Price Waterhouse.

Water Filtration Business Segments

Nephros water filtration business is comprised of lines of business: medical water filtration and commercial water filtration

We offer a robust line-up of solutions that support an array of installation applications for both water safety and quality

Medical Filtration

Medical water filtration is our core business, and within this segment are two sub-categories: **Infection Control** and **Dialysis**

All solutions in this segment are FDA 510(k)-cleared as Class II medical devices for effective retention of waterborne pathogens

MEDICAL FILTRATION

Superior Technology

Our FDA Class II water filters are capable of effectively retaining bacteria, viruses, and endotoxins with proprietary, hollow-fiber media. This exceptional filtration technology is born from years of service in the field of dialysis, arguably the gold standard of all fluid purification.

Our hollow-fiber membranes work through size exclusion and enable the retention of bacteria, viruses, and endotoxins

MEDICAL FILTRATION

INFECTION CONTROL

Infection Control

— BENEFITS AND CAPABILITIES

- Purify EPA-quality water to be suitable for drinking, surgical handwashing, and medical equipment cleaning
- Aid in infection control while supporting facility safety and continuity of operations
- Provide effective barrier for bacteria, viruses, and endotoxins
- Ideal for both remediation of compromised water and preventative water management

— APPLICATIONS

 Installation supported at sinks, showers, manufacturing or healthcare equipment, and ice machines

MEDICAL FILTRATION

INFECTION CONTROL

Infection Control Business Drivers

INFLUENCES

- CMS, TJC, ASHRAE
- ASHRAE 188 and (new) 514 detail water management plan guidance

CUSTOMERS

- Healthcare facilities
- Government
- Manufacturing
- Schools
- Labs

SALE TYPES

- Programmatic (recurring replacement orders)
- Emergency (outbreaks / compromised water events)

MEDICAL FILTRATION

DIALYSIS

Dialysis

BENEFITS AND CAPABILITIES

- Offer sub-micron purification of water and bicarbonate concentrate following other water treatment equipment, such as reverse osmosis
- Ideal for a variety of configurations throughout the dialysis water loop
- Long, continuous 12-month (1-year) filter life
- Available in dual- or single-stage filtration designs
- Compact options available to support low-flow setups

— APPLICATIONS

 Installation supported within water rooms following RO, into water lines as polishing stage, and within both stationary and portable dialysis machines

MEDICAL FILTRATION

DIALYSIS

Dialysis Business Drivers

INFLUENCES

- ISO and ANSI/AAMI (new standard ST108)
- Dedicated national sales coverage

CUSTOMERS

- Dialysis clinics and dialysis wings within healthcare facilities
- OEM partners

SALE TYPES

- Large accounts (fewer players)
- New product development

COMMERCIAL FILTRATION

Commercial

BENEFITS AND CAPABILITIES

- High-quality reduction of water contaminants like lead, scale, and sediment
- Improved equipment performance and efficiency
- Reduced machine maintenance
- Available in multiple keys and sizes to fit a variety of manifold configurations
- Phosphate- and carbon-free options available

— APPLICATIONS

 Installation supported at food / beverage machines, ice machines, coffee / tea makers, bottle fillers, and drinking fountains

COMMERCIAL FILTRATION

Commercial Business Drivers

INFLUENCES

 IAPMO, NSF, and ANSI standards

CUSTOMERS

- Restaurants and quick-service restaurants (QSR)
- Convenience stores
- Hospitality
- Facilities with cafeterias and/or staff kitchens

SALE TYPES

 Programmatic (recurring replacement orders)

Looking Ahead

Growth Strategy

- · Continue expansion of sales coverage
 - Expanding sales team to further capitalize national opportunities
 - Expanding relationship with key distributors to help market coverage
- Increase cross selling between products and applications
- Continue converting one-time customers to programmatic
- Leverage changing regulatory guidance to drive sales and market share
- Explore new product, distribution, and service partnerships
- Launch digital tools to support products and customers

New Developments

PRODUCTS AND SERVICES

- · Digital tools to enhance Nephros value
 - Currently beta testing filter tracker to drive reorders and customer behavior
 - Development of a "digital twin" to monitor environmental inputs, anticipate usage, and drive strategy
- Release of a dedicated sterile processing solution to support ST108 demand
- Expanded international clearances for most in-demand dialysis solutions
- Addition of nano- and micro-plastic removal (NMPs) claims for each of our filtration segments
- · Investment in new verticals and product innovations

NEW DEVELOPMENT

Nano- And Microplastics

Human exposure presents multiple health concerns

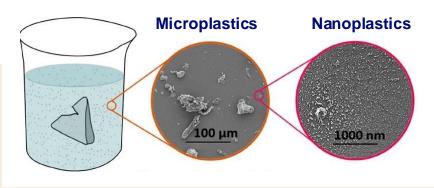

- · Nanoplastics penetrate biological barriers
- · Leaches toxic chemicals
- Results: cellular toxicity, inflammation, damaged DNA

Because we have the smallest pore size in the market... we are the best filter company to address NMPs."

0.005 µm/5 nm Direct Barrier!!

NEW DEVELOPMENT

Digital Tools

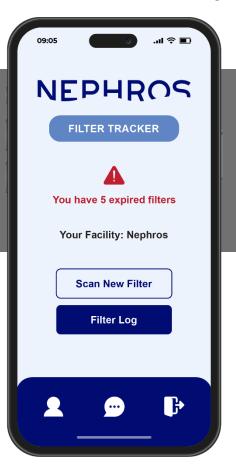

Enhanced Customer Experience

- · Documentation of filter installations
- · Captures critical data points
- · Digital tools increase Nephros value
 - Tracker drives reorders
 - Coming "digital twin" with real time environmental inputs

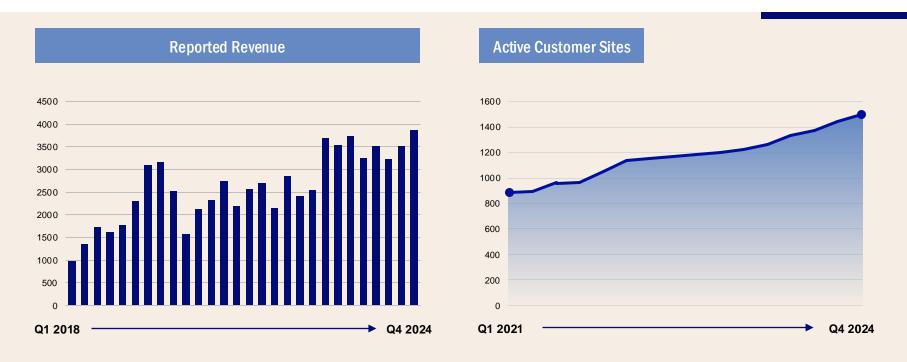

This is only beginning of what is possible in our digital environment."

Robert Banks, CEO and President

"We have taken an exciting step towards digitizing with the launch of a filter tracker."

EBITDA And Adjusted EBITDA

EBITDA and Adjusted EBITDA Definitions and Reconciliation to GAAP Financial Measures

EBITDA is calculated by taking net income (loss) calculated in accordance with generally accepted accounting principles ("GAAP") and excluding all interest-related expenses and income, tax-related expenses and income, and depreciation and amortization expense. Adjusted EBITDA is calculated by taking EBITDA and excluding non-recurring expenses and income and non-cash items, including non-cash inventory impairments and write-offs, and non-cash compensation. The tables on the following page present a reconciliation of EBITDA and Adjusted EBITDA to net income (loss), the most directly comparable GAAP financial measure, for the fourth quarters and twelve-month periods ended December 31, 2024, and December 31, 2023.

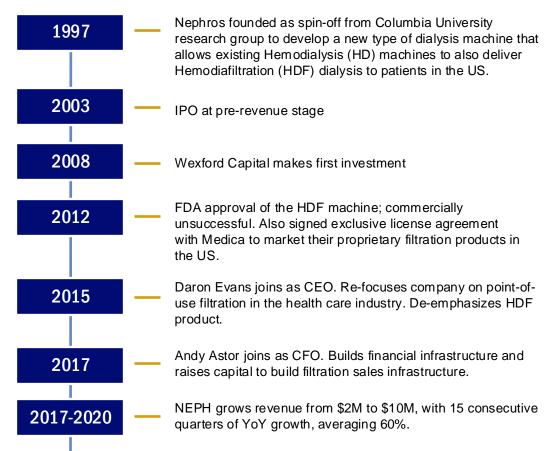

EBITDA And Adjusted EBITDA Reconciliation

2024	Q4 2024	Twelve Months Ended 12/31/2024	
	(in thou	(in thousands)	
Reconciliation of Net Income:			
Net Profit	349	74	
Adjustments:			
Depreciation of Property and Equipment	12	46	
Amortization of Other Assets	23	91	
Interest Expense	-	1	
Interest Income	(28)	(94)
